WORK EXPERIENCE:

TRUSMART INTELLIGENT DEVICES PVT LIMITED | APPLICATION DEVELOPER

Hyderabad | Apr 2021 - Mar 2024

- Worked as a React Native Developer, Design User Interface components and implement them using React Native and Redux.
- I avidly absorbed concepts in React Native, expanding my knowledge and skills in mobile app development. Experience using modern JavaScript tools such as NPM.
- Solid Knowledge of JavaScript / ES5+. Experience in building responsive mobile apps that consume restful API s. Hands on experience on React native with Redux and Hooks.

MBR INFORMATICS PRIVATE LIMITED | JR. PYTHON DEVELOPER

Hyderabad | Nov 2019 - Oct 2020

- Worked as a Junior Python Developer, Creating Restful APIs for CRUD Operations according to the Client Requirements.
- Integrating different types of Third – Party Services and proficient in REST API integration using Postman.
- Creating DBMS Schema according to the Client Requirements. Using different types of databases to the project.
- Version control Tools like GIT which includes functionalities creating Repo, push, pull, branching, tagging.

SKILLS:

- | | | |
|----------|------------------|-----------|
| • Python | • React | • Git |
| • Django | • React Native | • Postman |
| • HTML | • Redux | • Sublime |
| • CSS | • Android studio | • VS code |

PROJECTS:

- **Online Prep Course Website:** As a Python developer, I built backend Restful APIs and Third – party integrations in Python/Django Framework. An Online Preparation Course Website, which is for the student who want to do course online. Where students can register on website and login to the corresponding account and pursue their course by learning syllabus, giving Mock tests, achieving Targets on the Platform.
- **Medical App:** Created a Medical App, to get available medicines by ordering. As a React Native Developer, handled the whole front end in the project. Building components such as Uploading Prescription and get the medicines, can go for Hospital Visit by taking Online Appointment, Video consultants, Lab Tests. According to the Customer Requirements.
- **Water purifier App:** A water purifier app, which records the readings from purifier(device) and displays on the mobile application. Here, the user will install the app and connect with the purifier and get the live updates. Also records about the usage of the water quantity, subscription plans, details about the purifier, customer details. Connecting with third-party applications for OTP verification, Aadhar authentication. Also an admin app, which displays all the purifiers details and customers details, active subscription plans.
